14TH PNHRs Week Celebration

Health R&D in the New Normal: Moving towards Universal Health Care

9-13 AUGUST 2021

The Philippine National Health Research System (PNHRS) is an integrated national framework for health research in the country. It is a convergence strategy that aims to promote cooperation and integration of all health research efforts and stakeholders in the country to ensure that research contributes to evidence-informed health policies and actions.

The Department of Science and Technology (DOST), with the Department of Health (DOH), established the Philippine National Health Research System (PNHRS), by signing of a Memorandum of Understanding on March 17, 2003. In 2007, the Commission on Higher Education (CHED) and University of the Philippines Manila (UPM) joined as core agencies of the PNHRS.

ABOUT PNHRS WEEK

Every second week of August, the health research community celebrates the Philippine National Health Research System (PNHRS) Week.

Hosted by the Zamboanga Consortium for Health Research and Development (ZCHRD) with the Department of Science and Technology IX (DOST IX), this year's PNHRS Week theme is "Health R and D in the New Normal: Moving towards Universal Health Care".

In view of the COVID-19 pandemic, the celebration will stream a combination of live and pre-recorded material through various media platforms on August 3-13, 2021. It will serve as a venue for different stakeholders to share their best practices and experiences in pursuit of healthier lives for the Filipinos through health research and development. The event will also showcase new emerging partnerships to address the country's current challenges on health issues.

LOGO DESCRIPTION

The 2021 PNHRS Week Celebration logo incorporates elements that showcase the diverse and united people of this year's host – Zamboanga City.

The Vinta and its multicolored sail takes diversity front and center; an everyday means of transport, the paddleboat ferries people of various ethnicities, along with needed health and medical supplies to and from the city's neighboring islands, whilst navigating through uneven tides and unpredictable waters.

Alluding to the encompassing reach of Universal Health Care, the umbrella represents the PNHRS' inclusivity as an organization that champions health and health-related research via its multi-pronged programs accomplished by the various 17 REGIONAL consortia nation-wide.

The ring symbolizes the unity and harmony of the PNHRS in working towards holistic health care for the Filipino people. It encircles the entire logo to highlight the significance of health research in achieving Universal Health Care in the Philippines.

MESSAGE

Greetings to all of our partners in health!

For the 14th year celebration of the Philippine National Health Research System, we banner the theme: “Health R&D in the New Normal: Moving towards Universal Health Care” in recognition of the role that the System plays in facilitating the successful implementation of the Universal Healthcare Law (UHC).

Even before its institutionalization in 2013, the System has already provided significant inputs and contributions to the landscape of healthcare in the country from generating evidence-informed solutions and innovations to supporting landmark legislations such as the UHC.

The strength of the PNHRs lies in its diverse yet interconnected network, as we are always able to build on partnerships in R&D to help address the country’s most pressing health concerns and achieve our overall goals in health. As we move forward to the implementation of the UHC, we bank on the System’s diverse expertise and strong network once again to ensure that our communities will have access to better healthcare.

Although we are only meeting virtually this year, we hope that through the sessions, we can reiterate how nurturing partnerships will help in generating solutions that account for the healthcare needs of every Filipino across the country.

On behalf of the Department of Science and Technology - Philippine Council for Health Research and Development (DOST-PCHRD), I would like to thank the whole health research community, all of our partners and researchers in Luzon, Visayas, Mindanao and even those based abroad who worked tirelessly to make lives better for the Filipino, especially in the past year.

May we continue to build on solidarity to advance science, technology and innovation for better healthcare systems.

Maraming salamat po at mabuhay ang PNHRs!

MESSAGE

I would like to express my warmest salutations to all our partners in the global health community.

Together with our co-hosts, the North and South Luzon Clusters, the Visayas Cluster, and the Mindanao Cluster hosting the 4 satellite sessions on 03-06 August 2021,

“Bienvenidos A Zamboanga”, Home of Philippines’ 1st Olympic Gold!

The Zamboanga Consortium for Health Research and Development (ZCHRD), along with the Department of Science and Technology (DOST) Region IX, is very much honored to host the 14th Philippine National Health Research System (PNHRS) Week celebration.

Hosting this year’s PNHRS is a climb, given the current situation that we have and the tremendous success of the previous conferences organized by the different organizations and regions. Even then, we take on the challenge, understanding that it will be a great opportunity to learn and to reinforce its organizational capacity.

This will be another first for Region IX to host this immense, week-long event thru a different mode of convocation. Bearing the theme “Health R and D in the New Normal: Moving towards Universal Health Care”. This year’s Virtual Conference will unite Health Workers, Educators, and Research enthusiasts nationwide to share scientific and technical expertise relative to the CoViD -19 pandemic and its goal to consummate on Universal Health Care.

With this, I am inviting everyone to participate and welcome all the clinicians, health practioners, educators, and researchers from all over the country to this national convention as we all behold the triumph of this remarkable pursuit to move towards Universal Health Care.

Gracias a todos!

MARTIN A. WEE
Regional Director
Department of Science and Technology IX

MESSAGE

It is an honor and pleasure for Zamboanga Consortium for Health Research and Development (ZCHRD), together with the Department of Science and Technology Region IX, to co-host and welcome all the attendees of this 14th PNHRs Conference.

Following its yearly tradition, this year 2021- 14th PNHRs Conference Week is the first virtual conference with theme "Health R and D in the New Normal: Moving towards Universal Health Care". This experience of a virtual conference offers a broad range of sessions on the COVID-19 pandemic and its challenges will pull together researches and sharing of experiences among experts on the latest knowledge in their presentations. The comprehensive presentations have been assembled from a well selected experts devoted to cover a wide spectrum on COVID-19 topics from various regional experiences nationwide.

The conference will include scientific and technical sessions on universal healthcare as a unique rostrum to bring together clinicians, physician, educators, and researchers from all over the country serving as a platform to report, share and discuss issues and scientific achievements relative to the COVID 19 Pandemic and other pressing challenges in the aim to achieve universal health care.

We invite you all to join this 14th PNHRs virtual conference as we enjoy students and other stakeholders all over the country on the various research-based presentations for the whole PNHRs week celebration starting with satellite sessions from August 3-6, 2021 followed by three days preconference sessions on August 9-11, 2021, and main conference sessions on August 12-13, 2021.

The the four days satellite conference will be full of inspiration to openly present and discuss their work offering opportunities through the clustering of region presentation from a broad range of experiences. This will be an excellent opportunity to update attendees on research and presentations relative to health care challenges that will drive a future direction for basic, clinical, and translational investigations. Experience generates use and wisdom compels attention.

We enjoy you all to attend all the conference sessions. Evidence deserves to be reviewed on needs relevant to vaccines, healthcare, pandemic management to promote wellness, the key to address equal opportunities to achieve healthy communities.

We look forward to your attendance and share the excitement with us!

THEMATIC AREA: FINANCING FOR NATIONAL HEALTH SECURITY AND PANDEMIC PREPAREDNESS

RATIONALE:

The COVID-19 pandemic has overwhelmed the country's healthcare system. Thus, exposing the inadequacies of the pandemic preparedness plan.

In this session, research data on healthcare financing will be presented with the aim of laying a foundation for policy development geared toward health equity in the new normal.

OBJECTIVES/OVERVIEW:

HEALTH EQUITY AND HOSPITAL BED CAPACITY

The experience of COVID19 has shown us that our number of hospital beds and ICU beds are inadequate.

CAPACITATING PROVINCES AND CITIES FOR HEALTH TECHNOLOGY ASSESSMENTS

In UHC, HTA assessments are required by law before procurement of drugs, equipment, therapies, vaccines, and others.

HEALTH HUMAN RESOURCES AND THIRD PARTY ACCREDITATION

In UHC, primary health care will be the responsibility of Provinces and Cities, not the municipalities.

SHARING OF AGENCY'S ROLE AND PLANS FOR UHC AND PANDEMIC PREPAREDNESS

UHC related agencies will introduce their plans to support UHC.

THEMATIC AREA: STRENGTHENING THE NATIONAL HEALTH RESEARCH SYSTEM'S CAPACITY FOR RESPONSE AND RESEARCH

RATIONALE:

The virtual scientific conference which will be showcased as a satellite session for North Luzon Cluster is anchored on the subtheme "Strengthening the National Health Research System's Capacity for Response and Research." The topics which will be covered during this convocation shall:

1. Assist the various members of the different consortia to institutionalize their Research Ethics Committees in order to address the very small number of Research Ethics Board which gained recognition by the Philippine Health Research Ethics Board considering gaps or challenges of each institution in setting up their own REBs;
2. Familiarize the participants with Qualitative Research Studies which is a viable and effective tool for policy translation;
3. Strengthen health research networks and partnerships among the different institutional members of the consortium and sustain resilience amidst the challenges of the pandemic;
4. Capacitate researchers in response and research on health and determine what needs to be done to calibrate scope, methods, and analyses of data but not sacrificing the quality of the research and the validity of its results;
5. Realize the roles of the different agencies, HEIs, and health care institutions, to strengthen the response and research capacity of the region.

The sessions will be spearheaded by luminaries in public health, health researchers, academicians, and social scientists. Panel discussions will be held to learn the feedback and queries from the participants, from the point of view of being immersed in the grassroots, and point out solutions to their current and arising concerns as to how they can be better capacitated to conduct researches in health. The sharings of the panel of reactors will substantially describe the best practices of institutions along research capacitation.

THEMATIC AREA: ENHANCING REGIONAL PREPAREDNESS FOR PUBLIC HEALTH EMERGENCIES

RATIONALE:

The COVID-19 came like a thief in the night catching us so dreadfully unprepared, we basically did not know what to do. As is the nature of a pandemic, it has affected all sectors of the society with the healthcare sector being maximally challenged on all phases of care; losing a lot before getting a not so firm hold on this infectious problem. This is over and above the already daunting task of pre-COVID healthcare.

The academic institution is another severely ravaged sector what with all the adaptations of the processes tried for effectiveness if only to meet the learning needs of the students. Modular, blended would these the forever new normal for teachers and students alike? Tourism, transportation, trade and many more have beset the government to their wits end much less to implement the UHC program in a now dwindling economy. How has the government responded?

Having been through 18 months of battle still leaves the question of “Have we learned enough for another pandemic?” Though it would be off to prepare for, it would be so wrong if we get out of this not learning our lessons. In this symposium, we would want to ensure that whatever learning headwinds achieved will be shared to equip others with best practices to help mitigate this rampaging beast called COVID-19.

THEMATIC AREA: ENSURING GOOD GOVERNANCE AND ACCOUNTABILITY IN THE NEW NORMAL

RATIONALE:

The Philippine National Health Research System (PNHRS) in cooperation with the Philippine Council for Health Research and Development (PCHRD), will be conducting its 14th PNHRS Week Celebration this coming first week of August 2021 with the main theme, "Health R&D in the New Normal: Moving towards Universal Health Care". Prior to the main celebration, are the satellite sessions intended for different clusters hosted by the regional consortia in the country.

For the Mindanao cluster, the satellite session is anchored in the sub-theme, "Ensuring Good Governance and Accountability in the New Normal". Plenary topics will be discussed in line with the sub theme. For Caraga region, Prof. Rey Y. Capangpangan of Caraga State University will be introducing his project on the nanocellulose filter technology for a sustainable and increased efficacy of cloth facemask usage. For Region XI, Davao City Councilor Joselle Villafuerte will share the actions made by Davao City on their coordinated response with other LGUs against COVID-19 pandemic. Dr. Franco G. Teves of Region X will also share their positive pandemic outcomes in developing disaster resilient technologies. Provincial Government Officer Mike Galang of South Cotabato will also share their innovative contact tracing system for COVID-19. Dr. Michael Macion of BARMM will discuss the response of Datu Blah District Hospital on COVID-19 accountability and good governance. Finally, Dir. Noemi B. Edaga of Philippine Information Agency Region IX will also share their efficient communication practices for good governance in the new normal. The aim of the satellite session is to provide an avenue for sharing of innovative ideas and practices that can be replicated on other areas to help combat pandemic related issues and concerns for the country.

This session takes off with a presentation of the Report of the Nuffield Council on Bioethics on the Ethics of Research in Global Health Emergencies. The report's over-arching findings were made possible by the collaborative effort of an international working group, aimed to guide researchers, funders, governments, and international organizations in the challenging task of conducting research ethically within contexts of global health emergencies. The panel speakers contribute to the discussion from their unique perspectives as they share their own experiences in relation to the COVID-19 pandemic.

VISUAL ABSTRACT POSTER COMPETITION (PROFESSIONAL CATEGORY)

WEDNESDAY, 11 AUGUST
9 AM-4 PM

(BY INVITATION ONLY)

SESSION DESCRIPTION:

Research has significant implications for the community, particularly in health. A successfully completed health research study, especially with substantial results, must be communicated to key stakeholders to empower decision making. In this light, it is important for researchers to know how to communicate research findings to inform and share evidence to the general public. This activity aims to exercise and cultivate researchers' academic, presentation, and research communication skills.
